A. USER QUESTIONNAIRE (End-Users)

Instructions

Rate each statement based on your experience using the system.

Scale:
1 – Strongly Disagree
2 – Disagree
3 – Neutral
4 – Agree
5 – Strongly Agree

---

1. Usability

1. The system is easy to learn.
2. The system is easy to use.
3. The interface is visually clear and understandable.
4. Navigation within the system is simple.

---

2. Functional Suitability

5. The system provides the features I need.
6. The system performs tasks correctly.
7. The system meets my expectations.

---

3. Performance Efficiency

8. The system responds quickly to my actions.
9. The system loads quickly.
10. The system performs well during use.

---

4. Reliability

11. The system works without crashing.
12. The system functions consistently.
13. The system is available when needed.

---

5. Security (User Perspective)

14. I feel my data is secure when using the system.
15. The login and access features are safe.

Overall Satisfaction

16. I am satisfied with the system.
17. I would recommend this system to others.

B. EXPERT QUESTIONNAIRE (IT / Evaluators)

Instructions

Evaluate the system based on technical and quality standards.

Scale:
1 – Strongly Disagree
2 – Disagree
3 – Neutral
4 – Agree
5 – Strongly Agree

---

1. Functional Suitability

1. The system functions align with specified requirements.
2. The system produces accurate outputs.

3. Functional completeness is achieved.

---

2. Performance Efficiency

4. The system demonstrates acceptable response times.
5. Resource utilization is efficient.
6. The system handles workload effectively.

---

3. Compatibility

7. The system integrates well with other systems.
8. The system is compatible across platforms/environments.

---

4. Usability

9. The UI follows standard design principles.
10. The system provides clear feedback to users.
11. Error messages are informative and helpful.

---

5. Reliability

12. The system handles errors gracefully.
13. The system can recover from failures.
14. The system demonstrates stability.

---

6. Security

15. The system implements proper authentication mechanisms.
16. Data protection measures are adequate.
17. The system prevents unauthorized access.

---

7. Maintainability

18. The codebase is modular and well-structured.
19. The system is easy to debug and modify.
20. Documentation is sufficient for maintenance.

---

8. Portability

21. The system can be deployed in different environments.
22. Installation and setup are straightforward.

Overall Evaluation

23. The system meets software quality standards.
24. The system is ready for deployment.
